

Medicare Rates are Changing

Effective **November 27, 2023**, there will be an average increase of 18% on Emergency Medical premiums with as little as 6% on Rate Category B & C. The following Plans are affected:

- Single-Trip Emergency Medical Plan
- Multi-Trip Emergency Medical Plan

We carefully considered a number of key factors, including medical inflation, claims experience, and the weakening of the Canadian dollar. Revising our rates will help ensure that we continue to provide the level of protection that our policyholders - your clients - enjoy today, while maintaining our competitive pricing.

You can view the new rate card available in TIPS on November 27, 2023 by visiting the View Documents section.

All saved quotes in TIPS will automatically be converted to the new rates on November 27, 2023. After the new rates are in effect, we will no longer offer the previous rates.

Thank you for your continued partnership.
